Projects

yunqiao-platform React

Yunqiao Industrial Digital Component Center
As the front-end owner, responsible for the development and maintenance of Yunqiao Workshop and Yunqiao Asset Market, and participate in the baseline development and customized development of commercial versions. Improve the experience and optimize the performance of the Domain-Driven Design diagram editor in the platform. Front-end
<https://gts.work/portal/yunqiao>

startrails-dag-editor React

Lightweight task scheduling tool
Implemented based on AntV X6, which arranges server-side task execution logic in a drag-and-drop manner. Supports the use of multiple running logics such as serial and parallel, supports the configuration of different task nodes such as Shell and Python, and supports legality check and automatic arrangement of nodes. Front-end

damo-official React

Alibaba Damo Academy official website
Participate in the official website upgrade project of Alibaba Damo Academy and Yunqiao, responsible for the transformation and development of the login registration module and personal account management module. Front-end
<https://damo.alibaba.com>

netunion-dnrs-web Vue

Online repair system for dormitory network of UESTC
Internet users can submit repair orders online and track the progress of them. Solvers can accept orders, add processing information, and view order operation logs. Full stack
<https://github.com/uestclug/netunion-dnrs-web>

lug-official Vue

Official website for LUG, UESTC
Use Markdown to write news and blogs, provide navigation links to various services, and better show the elegant demeanor of the LUG team. The design refers to the official website of Tsinghua University TUNA Association. Full stack
<https://github.com/uestclug/lug-official>

Contributions

mdimg TypeScript

Convert Markdown to image
Allows custom templates to convert input Markdown or HTML documents into images that suit your needs
<https://github.com/LolipopJ/mdimg>

hexo-theme-archer EJS

A modern Hexo blog theme
Develop new features (such as dark mode), improve mobile adaptation, fix known issues -- help the theme become better
<https://github.com/fi3ework/hexo-theme-archer>

design-patterns-for-humans-zh

[Design Pattern Tutorial for Chinese Readers]
The Chinese translation version of the open source tutorial design-patterns-for-humans, for reference in learning design patterns
<https://github.com/LolipopJ/design-patterns-for-humans-zh>

SOSCONF2020 Vue

Official website for 2020 Students Open Source Conference of Chinese
Front-end design of [About Us] and [Sub-venue] pages
https://gitlab.com/uestclug/sosconf_zh.gitlab.io
